EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentile	Year
B.Tech in AI	NIT Surat	9.54	2023–Present
Higher Secondary	GSHSEB	99.70	2022–2023
Secondary	GSHSEB	98.90	2020–2021

EXPERIENCE

- Great Notes** Oct 2024 - Jan 2025
Full Stack Developer Remote
 - Designed, developed, and deployed a dynamic website from the ground up, ensuring robust functionality and scalability.
 - Collaborated cross-functionally with designers and developers, streamlining the development lifecycle for optimal efficiency.
 - Successfully launched a fully operational, commercially viable platform, demonstrating strong full-stack expertise.
- PhysicsWallah** Apr 2024 - Jun 2024
Subject Matter Expert (Physics) Remote
 - Provided in-depth subject matter expertise, curating high-quality physics content for enhanced student learning.
 - Developed comprehensive solutions and academic resources, ensuring accuracy and conceptual clarity.

PROJECTS

- Anveshak - Personalized Cold Email Generation System** May 2025 – May 2025
AI-Powered Cold Mailer for Job & Academic Outreach [Website](#) | [GitHub](#)
 - Developed a comprehensive **AI-driven platform** for generating personalized cold emails targeting employers and academic faculty based on **resume analysis and company/faculty matching**.
 - Integrated advanced **Resume Parsing and LLM response parsing** algorithms, utilizing Google Gemini for **resume parsing, company research, and email content generation**.
 - Built a **microservice architecture** using the MERN stack (MongoDB, Express, React, Node.js) for seamless data processing and communication between system components.
 - Enabled email generation for both job applications and academic collaborations, providing features like **company research, faculty matching, and customizable email templates**.
 - The project attracted **1820** users in the first month of its deployment.
- CarbonTrack - Carbon Footprint Tracker & Environmental Impact Monitor** May 2025 – Present
AI-Powered Carbon Footprint Tracker for Users & Organizations [Website](#) | [GitHub](#)
 - Developed an **AI-driven web platform** for tracking and reducing carbon footprints for individual users, organizations, and departments.
 - Implemented **real-time monitoring** for environmental metrics, including temperature, energy usage, water consumption, and CO2 levels, using **WebSockets** for instant updates.
 - Designed and integrated **AI-based recommendations and insights** to help users and organizations reduce their carbon footprints based on monitored data.
 - Created a **product impact analysis** feature, providing users with carbon footprint breakdowns for products based on material and frequency of use, with AI-driven eco-friendly alternatives.
 - Built **voucher-based reward systems** for users and organizations to incentivize carbon reduction efforts and provide **government incentives** for carbon emissions reductions.
 - Enabled **departmental carbon footprint tracking** and reporting for organizations, allowing in-depth analysis and eco-friendly solution suggestions for each department.
- WanderBot** Feb. 2025 - Present
GenAI-Powered Travel Assistant [Website](#) | [GitHub](#)

- Built an **AI-powered travel assistant** using **Gemini Pro** to generate **personalized travel itineraries**.
 - Integrated **Eventbrite API** to fetch suggested travel destinations based on user preferences.
 - Used **AviationStack API** to provide real-time **flight options** from the user's origin to their destination.
 - Implemented a **train journey search** feature, particularly useful for travel within India.
 - Developed a **hotel recommendation system**, suggesting accommodations near the user's destination.
 - Added a **fun travel facts generator** to enhance user engagement and keep the wanderlust alive.
 - Designed a **beautiful and intuitive UI** for seamless user experience.
-
- **MagicBot - Voice LLM** Mar 2025 - Mar 2025
Real Time Voice Assistant [GitHub](#)
 - Built a **real-time voice assistant** leveraging **Groq's LLM** for intelligent conversation handling.
 - Utilized Python's BytesIO and gTTS libraries for seamless **text-to-speech** conversion and **audio streaming**.
 - Enabled smooth **interactive dialogues** with low-latency voice responses for a natural user experience.
-
- **Gesture Controlled Suite** Mar 2024 - Jun 2024
Computer Vision-Based Application [GitHub](#)
 - Developed an **AI-powered gesture recognition system** enabling intuitive control over digital interfaces.
 - Enhanced user experience by providing a **hands-free, gesture-driven interface** for various applications.
 - Implemented **gesture-based functionalities**, including **mouse and keyboard control, PPT navigation, air draw, 3D object manipulation, Pomodoro timer, screenshots, and screen zoom**.
 - Utilized **OpenCV & MediaPipe** for efficient real-time hand tracking and gesture classification.
-
- **ShieldGuard - Secure AI Platform for Veterans & Military Agencies** May 2025 – Present
Military-Grade AI Platform for Mental Health, Communication & Intelligence [Website](#) | [GitHub](#)
 - Built a **multi-feature AI-powered platform** tailored for veterans, active-duty soldiers, and military agencies, addressing mental health, communication, and real-time intelligence needs.
 - Developed an **AI-driven PTSD Companion chatbot** for trauma care, offering 24/7 emotional support, guided therapy, and crisis intervention in a discreet, accessible manner.
 - Engineered **blockchain-secured communication** channels enabling encrypted, interception-proof real-time intel sharing for tactical operations.
 - Created a **Veteran Skill-Sharing Hub**, facilitating mentorship, gig-based employment, and expertise monetization to support post-service transitions.
 - Aggregated battlefield updates, cyber-threat alerts, and verified military news through a **centralized AI-powered intelligence center**, reducing misinformation and aiding rapid decision-making.
 - Designed platform with a **modular and scalable architecture** to support cross-agency collaboration, secure role-based access, and seamless deployment.
-
- **EcoBrew - AI-Driven Sustainability Platform** Aug. 2024 - Present
MERN Stack + AI for Environmental Impact [Website](#) | [GitHub](#)
 - Developed an **AI-powered platform** to **reduce paper cup waste** and promote sustainability.
 - Created a **personalized tracking system** to monitor **waste reduction & chemical exposure savings**.
 - Designed a **dynamic impact dashboard** with **real-time analytics** and leaderboards.
 - Integrated **GPT-2 & NLP for AI-powered eco recommendations** to guide users toward sustainable choices.
 - Built an **interactive insights hub** to provide users with the latest sustainability blogs, news, and eco-friendly practices.
-
- **Smart Healthcare Platform** Sep. 2024 - Present
AI-Powered Health Monitoring & Doctor Booking [Website](#) | [GitHub](#)
 - Created a **real-time health recommendation dashboard**, updating **every 5 minutes** based on **Fitbit/smartwatch data**.
 - Developed a **healthcare platform** offering **doctor bookings, health analytics, and community support**.
 - Implemented **location-based doctor booking** for home visits.
 - Built **health metric calculators** for real-time health tracking.

- Designed an **awareness page** providing monthly insights into **diseases, symptoms, risks, prevention, and treatment**.
 - Integrated a **Medicine Recommendation System** offering **drug alternatives and proper dosages**.
 - Built a **Medicine Usage Helper**, providing **detailed descriptions of medicine usage, side effects, and interactions**.
- **Tarang - Drone Project** Apr 2024 - Present
Autonomous Navigation & Precision Landing Drone System [GitHub](#)
 - Contributed as a core member of the **coding team** in an autonomous drone project focused on real-time mission execution and precision landing.
 - Developed a custom **navigation algorithm** for autonomous travel to a specified GPS coordinate, followed by a **precision landing system** using ArUco markers and QR code detection.
 - Integrated an automated **return-to-launch (RTL)** feature for safe retrieval after mission completion.
 - Actively involved in the **physical assembly and piloting** of the drone, contributing to mechanical setup and flight testing.
 - Assisted in **avionics selection and integration**, ensuring compatibility between flight controller, telemetry, and onboard sensors.
 - Currently developing **terrain detection algorithms** to enhance autonomous obstacle avoidance and landing safety in dynamic environments.
- **Capify - Personal Finance Assistant** Jul 2024 - Present
Web Application [Website](#)
 - Developed a comprehensive **finance management platform** with tools for **budget tracking, expense management, and financial insights**.
 - Implemented **Split-Smart**, a feature simplifying **bill splitting** and tracking shared expenses seamlessly.
 - Designed various **recommendation-based calculators** to assist users in financial planning.
 - Integrated a **blogs & resources** section, providing users with expert financial guidance, including articles, podcasts, and talks from industry leaders.
 - Built an **AI-driven stock market price prediction model** to help users make informed investment decisions.
 - Developed a **personalized financial recommendation engine**, providing **five key suggestions** based on user data.
 - Implemented an **invoice summarizer & data analyzer**, automatically extracting insights from uploaded invoices.
- **Agro We - Smart Agricultural Platform** May. 2024 - Present
Web-Based Decision Support System [Website](#) | [GitHub](#)
 - Designed a **web app for precision agriculture**, providing farmers with **real-time insights** for better decision-making.
 - Developed a **user-friendly dashboard** with dynamic visualizations and a **weather forecasting system** for improved farm planning.
 - Implemented a **recommendation engine** tailored to **soil type, crop selection, rainfall prediction, and farming season**.
 - Empowered farmers by **simplifying complex agricultural data** into actionable insights to boost productivity and sustainability.
- **Task Manager Application** Feb. 2025 - Present
React Native-Based Task Management [GitHub](#)
 - Developed a **React Native task manager** enabling users to **create, update, delete, and organize tasks**.
 - Implemented **task dependency management**, allowing users to set and visualize dependencies between tasks.
 - Designed an **overdue task lookup system** to highlight and manage missed deadlines effectively.
 - Integrated a **task scheduling feature** for users to plan and prioritize upcoming tasks efficiently.
 - Built an **interactive task visualization** to provide a clear hierarchical view of task relationships.

SKILLS

- **Programming Languages:** Python, C++, C
- **Artificial Intelligence:** Machine Learning*, Deep Learning, Generative AI, RAG LLM, AI, Computer Vision
- **Web Development:** React.js, Next.js, TypeScript, Javascript, Tailwind CSS, Bootstrap, Webflow, Wordpress
- **Databases & Tools:** MongoDB, SQL, Qdrant, GitHub, Web Hosting, Docker
- **Other Skills:** Competitive Programming, Data Structures and Algorithms, Prompt Engineering, Drone Making, Entrepreneurship

RESEARCH WORK

- **Robust Audio Forgery Detection using Deep Learning** 2024 - Present
Digital Security and AI Research
 - Proposed a **deep-learning pipeline** for **detecting audio forgeries**, specifically **deepfake forgery**.
 - Integrated **Mel-spectrogram, multi-scale feature fusion, and transformer-based attention mechanisms** for enhanced detection accuracy.
 - Addressed challenges posed by **overlapping noise and complex forgery patterns**, improving model generalization across diverse attack scenarios.
 - Experimented on the **ASVspoof 2017 dataset**, achieving **state-of-the-art performance** under both clean and noisy conditions.
 - Optimized the model for **real-time applications** by incorporating **preprocessing techniques** that enhance detection accuracy.

ACHIEVEMENTS

- **National Level GeeksForGeeks Hackathon (Avishkaar Season 2)** - Secured **3rd Runner-up** position.
- **Statistella - IIT BHU National Level Data Analytics Competition** - Secured **3rd Runner-up**.
- **Autonomous Drone Development Challenge - ADDC 2025** - Secured **AIR 2** and **2nd Position** in Safe Design Category.
- **10x Finalist Positions:** Avishkaar, Statistella, BITS GOA AI Hackathon, Convolve 3.0 (PAN IIT AI Hackathon), Gujarat Vidyapeeth x Odoo Hackathon, Hackcrux, SAE India Business Plan Competition, Quarkz Hackathon, Gandhian Ideathon Competition.
- **IICPC Merit Holder:** Secured **1324** overall rank in the IICPC organised Codefest-2025.
- **Codex (ACM_CEG)** - Achieved **4th place** in 1st edition.
- **Web Wonders (NEXUS, NIT Surat)** - **Runner-up** in the Website Design Competition.
- **Competitive Programming:** Achieved a peak rating of **1295 on Codeforces**, successfully solving **330+ problems on Codeforces** and **350+ on LeetCode**.

POSITIONS OF RESPONSIBILITY

- **Junior Developer**, Google Developers Group on Campus Jan 2025 – Present
- **Co-Head**, Technical Committee, MindBend Nov. 2024 – Present
- **Senior Executive**, Research and Innovation Council jun 2024 – Present
- **Senior Technical Member and Web Dev Head**, Phoenix Aero Drone Department Mar 2024 – Present
- **Member**, Nexus: Departmental Cell of CSE and AI Sep 2023 – Present
